

The Capsule

2016 Marketplace Open Enrollment

November 1, 2015 thru January 31, 2016

The AIDS Drug Assistance Program (ADAP) will continue to provide healthcare insurance coverage for selected clients during 2016. If you are a current ADAP client identified for healthcare insurance coverage, you will be contacted by your local county health department regarding enrollment instructions for 2016.

Q. What is ADAP?

A. ADAP is a medication program that provides access to HIV/AIDS drugs to eligible persons who are uninsured or underinsured.

Q. How does ADAP provide clients with HIV/AIDS medications?

A. ADAP provides HIV/AIDS medications in one of three ways:

- ⇒ Providing medications to you directly through the local county health department.
- ⇒ By purchasing insurance plans that cover HIV/AIDS medications that are on the Florida ADAP formulary*, or
- ⇒ By helping you with premiums, copays and/or deductibles for your approved insurance plan.

Q. Why would ADAP purchase insurance plans for eligible clients?

A. When ADAP purchases insurance for you, it is the main priority of ADAP to ensure your medication needs are met.

- ⇒ ADAP will only purchase insurance plans that cover ADAP formulary* medications.
- ⇒ ADAP will only cover plans that are approved by the State ADAP program office. A list of approved plans will be made available mid October, 2015.
- ⇒ Plans are evaluated for cost effectiveness, allowing the use of limited dollars to serve more clients.
